solutions, services & technologies for
landscape management

operational reviews & improvement
strategic planning & policy
resource analysis & modelling
management technologies, including...

TASKVIEW™

...an asset maintenance task management software system

designed by Australian Landscape Management to harness the four key elements of successful maintenance program management in a single powerful package:

| | |
|---------------------|---|
| prioritising | timing and sequencing of tasks |
| integrating | co-ordinating and scheduling activities |
| monitoring | verifying and auditing completed works |
| reporting | communicating and informing |

...an upgrade of existing software systems currently in use in the ACT, and with the Cities of Melbourne, Cardinia and Casey.
